

April 2, 2019

Dear Parents,

The Amazing Book Challenge is back! This is the fifth year and Chetwynd students have read over 7000 books during our previous Amazing Book Challenges!

This year all schools will be working together to borrow and read as many books as we can. The Chetwynd Public Library is very excited to support this challenge by purchasing STEM kits for all schools to use! This is possible with the funding from DECODA. The more books read the more prizes to be won. The STEM (Science, Technology, Engineering, Math) kits promote problem solving, critical thinking and using your imagination. It will be very exciting to have these kits available at the Chetwynd Public Library for all schools in Chetwynd to borrow and expose our students to STEM.

There will also be weekly prizes that will be given to students every Friday.

The Coffee Talk has graciously agreed to support us again this year and put our students into the Coffee Talk paper! Look for our students each week!

Our goal is to read 1500 books! Please take your child into the Chetwynd Public Library to help achieve our goal.

If you have any questions, please contact the Chetwynd Public Library at 250-788-2559 or Wendy Pohl at 250-788-2531.

So let's get reading!
